Junior Software Developer (Intern) Tirunelveli
 - Contributed to web application development, collaborated with a team of developers, and gained practical experience in project management and teamwork.

PROJECTS

- Project A: Naachiyar Construction: Consultation Designing System** Jan 2024 - Apr 2024
Tools: [Python (Django), HTML, CSS, JavaScript, MySQL] [🔗][🌐]
 - Built a consultation system to simplify the client consultation process, reducing manual work by 40%.
 - Developed a user interface with Django and JavaScript for clients to customize and view construction plans in real-time.
 - Designed a database using MySQL to manage client data, consultation records, and design templates effectively.
 - Used data validation to ensure accurate and consistent client information, improving system reliability.
- Project B: Weather Monitoring Web Application** June 2024
Tools: JavaScript, HTML, CSS, OpenWeather API [🔗][🌐]
 - Created a weather app using JavaScript for real-time updates on any location.
 - Integrated with the OpenWeather API to show accurate weather data like temperature, humidity, and wind speed.
 - Built a user-friendly interface with HTML and CSS, ensuring it is responsive across all devices.
 - Improved performance by reducing API calls and caching data, speeding up load times by 30%.

CERTIFICATIONS

- Developing Front-End Apps with React- IBM Jul 2024
- JavaScript Programming - SOSHAI. Feb 2024
- Advanced SQL Programming - Great Learning. Sep 2024
